

Collaboration beyond measure.

What is the gauge for collaboration?

UVA health professionals thrive on the complex, challenging cases a Magnet-designated academic medical center offers. From the moment a patient arrives, it's the attributes of every employee that help elevate our care. Qualities such as persistence, ingenuity, dedication and initiative. The impact of these attributes can't be calculated. But they create an environment of trust and collaboration, in which your contribution counts. Are you an independent thinker who works well with others? UVA wants you.

The University of Virginia Medical Center is a 600-bed facility serving a primarily rural population in Central Virginia. Our facilities feature a physician order entry computer system, extensive ambulatory care services, a Level I Trauma Center, an organ transplant program, regional burn and spinal cord injury centers, children's hospital, and many other innovative health services. Our growth plans include the opening of a long term acute care facility in June 2010 as well as a bed expansion and the Emily Couric Clinical Cancer Center in 2011.

The Department of Pharmacy Services provides centralized dispensing services and decentralized clinical services and employs clinical pharmacy specialists and clinical pharmacists. The Department has a state of the art IV clean room and also operates pharmacist-run outpatient clinics and an outpatient dispensing pharmacy. In addition, the department has three ASHP-accredited residency programs and serves as a training site for the experiential education of pharmacy students from Virginia Schools of Pharmacy.

We are currently seeking the following positions: Director of Acute Care Services, Medication Safety Officer, Drug Information Specialist, as well as various Clinical Coordinator and Clinical Pharmacist positions.

For more information, please contact Richard Covington at 1-800-843-8276 or RLC6Z@virginia.edu. You may also visit us online at www.uvajobsbeyondmeasure.com. EOE/AA M/F/D/V
